Jeff: The assumption is that the markets and the economy are doing well which creates the climate for another Enron ad. The goal of the strategy is that each version of the ad will be a minimum of 90 sec, will contain a key message, and is targeted to garner media air time at a specific time. As you indicated, there may be other ways to increase market penetration with Enron, and the testing is designed to provide us information to help us develop alternate strategies. Also, the number of weeks and weeks prior to the Super Bowl that the ad airs is different each year. The target for this year's game is the week of January 30th. Our goal is to ensure that the message of the ad is consistently effective regardless of how many times the ad runs. The next phase of the strategy will be to test the message of the ad in Philadelphia and Columbus on October 30th. The key focus will be whether or not the ad moves more consumers to the comparison sales sites compared to last year. This is not a formal test where we sample consumers. We have troubleshooters in the field and are sampling as they visit homes in commercial markets and neighborhoods in the target cities to see what moves consumers to the sites. The data will be used to identify whether or not the message of the ad is able to move consumers to the sites and the expected monetization rates. We will provide you information on the test after the campaign. Let me know if you have any questions. Steve[Human leptospirosis]. After a brief notice of the serogroup distribution of the different leptospirosis serovars, the authors underline the fact that the incidence of human leptospirosis has been increasing in Europe since the 1950's, and then the 1970's. This increasing incidence is related to new specific control strategies, which have been adopted in the course of two decades. Regarding epidemiological data, it is not possible to state with certainty that it is related to

When I try to clone I get this error message: hg clone -r v2.x --dest /testrepo abort: pathspec 'v2.x' did not match any files Is it only possible to clone entire branches one-by-one? I would rather clone them in one go. I have tried setting the working directory. A: Clone one branch at a time with --branch arg: hg clone -r v2.x --branch v2.x /testrepo I suppose this works because even though hg clone is not directly a Mercurial command, it utilizes hg branch internally. /\*\* \* Copyright (c) 2016-present, Facebook, Inc. \* All rights reserved. \* \* This source code is licensed under the BSD-style license found in the \* LICENSE file in the root directory of this source tree.
